

Westpark Business Campus Shannon Energy Audit

Client: Westpark Business Campus
Architect: N/A
Services Engineer: Fahey O'Riordan
Status: Completed 2009

Description:

Energy Audits of the Westpark Business Campus Buildings 3000 & 4000, to review existing energy consumption patterns and identify energy saving opportunities that would enhance their already energy efficient buildings. Each building consists of a total floor area of 10,200 m² over five floors with multi-tenancy occupation. Primary utility plant is operated and maintained by the landlord's campus management company.

Features:

- Comprehensive audit of existing energy usage
- Assessment of Building Management System to identify improved energy efficiency strategy
- Preparation of Action Plan detailing energy saving opportunities
